

Ulyana Kryzh

Business System Analyst

kryzhulyana@gmail.com +357 95 0 939 54 tg: @kryzhulyana ukryzh.github.io/en Cyprus

Business Analyst with 5+ years of experience designing IT solutions in fintech, banking, and iGaming. Combines deep requirements ownership (BRD, User Stories, Use Cases) with hands-on system design: REST API integration schemas, DB modeling, UML/BPMN, and solution architecture. Proven track record of delivering measurable outcomes, automated Core Banking workflows, and built AI-powered tooling. Fluent in English, based in Cyprus.

WORK EXPERIENCE

Business Analyst · Obelis (iGaming) Sept 2025 - present

- Led end-to-end requirements elicitation and impact analysis for platform feature implementations: authored functional specifications, decomposed epics into User Stories with full acceptance criteria and edge case coverage
- Serve as main point of contact for requirements clarification across QA, PM, and SA teams - ensuring shared understanding of scope, constraints, and non-functional requirements
- Established a regulatory requirements documentation system across multiple markets; applied to product certification processes prior to release on regulated markets (UAT coordination)
- Designed workflows and configured Jira Service Management for internal support teams, including integration with existing tooling
- Built a local automated meeting transcription tool using Whisper and Python - reduced documentation turnaround time by 80%; fully on-premise deployment ensured no confidential data was sent to third-party services
- Contributed to development and testing of a RAG system (local LLM + Confluence) for intelligent search across internal documentation

IT Business Analyst · VEBTECH (BeVEB Bank projects) 2024 - 2025

- Developed technical specifications for changes to Core Banking systems - defined system interfaces, integration points, and data flows; collaborated with architects on solution design from scratch
- Built and visualized the business architecture of the bank, ensuring alignment of IT initiatives with business goals (TOGAF-based); coordinated with technical teams on feasibility and system design decisions
- Designed and implemented RPA solutions: reduced monitoring process cost by 3167%, lending process cost by 412% - full lifecycle from requirements to deployment
- Automated exchange rate calculation model: reduced error rate to 0% through structured data analysis and algorithmic modeling
- Improved electronic digital signature workflow efficiency by 80% by redesigning document flow and simplifying integration steps
- Described and analyzed 317 end-to-end business processes at the bank level using BPMN/UML; used SQL and structured data to identify optimization priorities for business and IT departments
- Developed an ITIL-based process effectiveness assessment system, enabling identification of inefficient use of key IT services

Business Process Analyst · Deloitte / BST Audit 2020 - 2024

- Designed and documented the System Quality Management: BPMN process maps, Internal Regulatory Documentation, SIPOC diagrams, instructions
- Standardized and optimized 110+ business processes, achieving average speed improvement of 12% through document flow simplification
- Developed a risk reduction framework covering audit controls and corrective actions
- Designed and delivered 15+ training sessions on SQM implementation for company employees

SKILLS & TOOLKIT

Business Analysis	Requirements elicitation & formalization (BRD, User Stories, Use Cases), impact analysis, stakeholder management, prototyping (Figma), UAT coordination, iGaming & fintech regulatory compliance
System Analysis	SRS, UML, REST API (Swagger), DB design (ER diagrams), SQL, non-functional requirements, microservices, integration schema design, solution design from scratch
AI & Automation	Python, Google Apps Script, Claude API, RAG, LLM, Whisper, prompt engineering, RPA
Process Analysis	AS-IS/TO-BE modeling (BPMN, IDEF0, UML), Process/Task Mining, Camunda, Business Studio, Power BI
Architecture	Business architecture design (TOGAF), IT-business alignment, system design, solution feasibility assessment
Tools & Methods	Agile, Scrum, ITIL, BPM, Jira, JSM, Confluence, Git, Miro, Draw.io, LucidChart, YouTrack
Languages	English - C1 (Advanced)

EDUCATION

Belarusian State Economic University - Logistics Economist 2015 - 2019
