Work experience

Sept. 2025 - present time - Obelis (iGaming) - IT Business Analyst

- Develop project requirements in compliance with regulatory standards across multiple markets
- Participate in platform feature implementation projects: requirements gathering, functional specifications, task decomposition
- Built an automated meeting transcription and structuring tool using Whisper, reducing documentation turnaround time
- Contributed to the development and testing of a RAG system based on a local LLM for intelligent search across internal documentation (Confluence)
- Established a regulatory requirements documentation system across multiple markets; serve as subject matter expert for technical teams (QA, PM, SA)
- Designed workflows and configured Jira Service Management for internal support teams
- Participate in product certification processes prior to release on regulated markets

2024 - 2025 - VEBTECH (BelVEB Bank projects) - IT Business Analyst

- Reduced the cost of business processes by implementing RPA: Monitoring - by 3167%, Lending - by 412%
- Automated the exchange rate formation process by implementing a model for automatic calculation of rates, which reduced the percentage of errors to 0
- Increased the speed of working with an electronic digital signature by 80% by simplifying document flow
- Developed a system for assessing the effectiveness of processes based on ITIL, which made it possible to identify inefficient use of key IT services
- Described 317 end-to-end processes at the Bank level, identifying priority optimization points for business and IT departments
- Built and visualized the business architecture, ensuring synchronization of IT initiatives with the organization's business goals
- Developed technical specifications and participated in the implementation of changes to the Core Banking systems as part of the above optimization initiatives

2020-2024 - Deloitte/BST Audit - Business Process Analyst

- Designed and described the Quality Management System (BPMN, Internal Regulatory Documentation, instructions, SIPOC)
- Standardized and optimized more than 110 business processes, increasing their speed by an average of 12% due to simplification of document flow
- Developed a system of measures to reduce risks (including audit and corrective actions)
- Developed and conducted 15+ training sessions on the implementation and use of the QMS for employees companies

Skills and Toolkit

- **Business analysis:** Requirements elicitation and formalization (BRD, User Stories, Use Cases), prototyping (Figma), stakeholder communication, iGaming regulatory compliance
- **AI Tools & Automation:** Python, Google Apps Script, Claude API, RAG, LLM, Whisper, prompt engineering
- **System analysis:** SRS, UML, REST API (Swagger), DB design (ER diagrams), SQL
- **Process analysis:** Process/Task Mining, AS-IS/TO-BE modeling (BPMN, IDEF0), optimization and automation (including RPA), Camunda, Business Studio, visualization (Power BI)
- **Solution architecture:** Building a business architecture, coordinating IT and business goals
- **Approaches and tools:** Agile, Scrum, ITIL, TOGAF, BPM, Jira, JSM, Confluence, Git, Miro, Draw.io, LucidChart, YouTrack
- **Languages:** English - C1

Education

2015-2019 - Belarusian State Economic University, Logistics Economist
